

HomeAgain®
A lost pet's best chance

How to customize these postcards

You will need Adobe Reader® to customize postcards.

- Save the file to your desktop
- Click on the "Highlight Existing Fields" button at the top right of the PDF to highlight the customizable fields
- Click within the customizable fields and replace existing copy with your clinic's personal information
- Save the finished file
- Print out customized postcards on recommended paper stock (be sure to select 2-sided printing*)
- Cut along dotted lines
- Place mailing labels and stamps on postcards and mail

Recommended paper stock

Choose a white, heavy card-weight paper stock compatible with your inkjet or laser desktop printer. The US Postal Service requires that paper stock used for postcards be no less than 0.007" thick and no more than 0.016" thick. This equates to a coated paper stock between 80 lb and 120 lb and an uncoated paper stock between 65 lb and 100 lb. Be sure to check your desktop printer to determine the maximum paper weight your printer can process.

*If your printer does not support 2-sided printing, you can elect to print one side at a time (print the front, flip the paper, and refeed through printer to print the back) or have the postcards printed at a local business support center.
